

EFFECTIVE WAYS TO PRESERVE THE QUALITY OF YOUR LUXURY FURNITURE

These are just some of the effective ways you can try to preserve the quality of your furniture.

Start with the right placement. The way you place your furniture can potentially ruin the finish of it. Make sure that you're placing them away from factors such as sunlight, temperature, and humidity.

Wooden furniture can also be prone to scratches, warping, spills, and staining. Make sure that you're avoiding objects and items that can potentially cause this.

Upholstery is also very sensitive. In particular, you have to avoid spills, snags, and stains.

Placement and location is everything. This also applies to your luxury furniture. The extreme weather conditions of the Philippines can put the longevity of your furniture to the test. Proper placement of furniture can significantly extend the life of a specific piece. It's not wise to expose your furniture to extreme heat, sunlight, and moisture. That is just a disaster waiting to happen. This is especially evident if your furniture is made of wood.

PLACEMENT

Avoid Direct Sunlight

Avoid Extreme Temperatures

Keep Away from Humidity

Lift Your Furniture Instead of Pushing

WOOD

Majority of luxury furniture in the Philippines is composed of wood. It's durable and aesthetically-pleasing but if you don't care for it properly, they can get scratched, warp, split, and acquire stains. Handle your wooden furniture with a lot of care.

Add felt pads to decorative items

Keep chemicals away from wooden surfaces

Avoid placing synthetic materials on wood

Don't write directly on wood furniture

Clean up spills immediately

Don't leave damp objects on your wood furniture

Use placemats for your dining

Luxury furniture in the Philippines such as living room pieces has upholstery that needs to be properly cared for. Like wood furniture, you need to protect them from spills, stains, and snags. If you want to keep your living furniture pristine, here are some tips you can try out.

UPHOLSTERY

Fluff your cushions

Turn over your cushions

Avoid sharp objects near your cushions

Keep materials with pigment away from your cushions to avoid staining
