

NEW YEAR. NEW ME:

LAVISH STYLES TO REVAMP YOUR BEDROOM

Au Naturelle

For any interior design, adding a touch of natural textures and colors grounds the room. Choose one material to highlight when redecorating and restyling your bedroom. Too many materials can move away from the essence of the natural look.

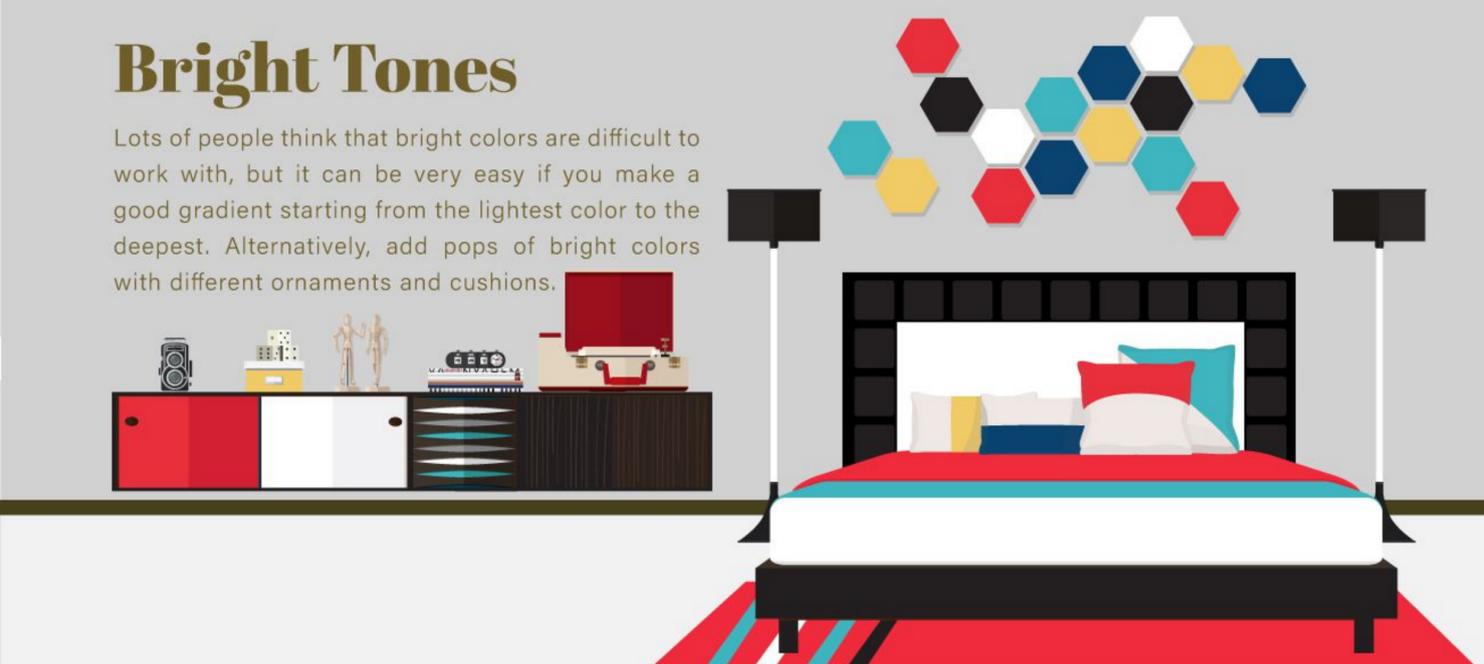

Cozy Farmhouse

Get a cozy and warm feeling with a farmhouse style bedroom. This aesthetic promises a clean and refined look while being relatively simple to style. To add life and interest to the farmhouse look, indoor plants such as succulents can freshen it up.

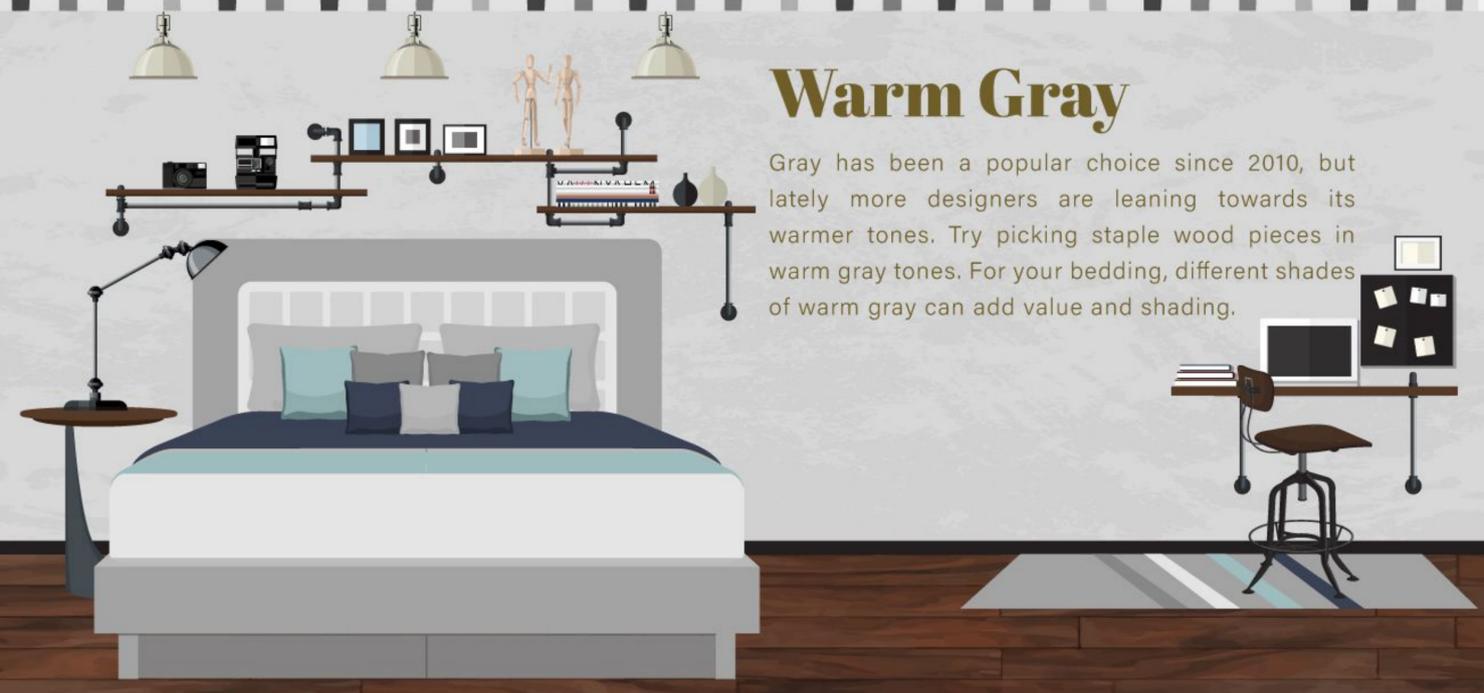

Bright Tones

Lots of people think that bright colors are difficult to work with, but it can be very easy if you make a good gradient starting from the lightest color to the deepest. Alternatively, add pops of bright colors with different ornaments and cushions.

Warm Gray

Gray has been a popular choice since 2010, but lately more designers are leaning towards its warmer tones. Try picking staple wood pieces in warm gray tones. For your bedding, different shades of warm gray can add value and shading.

KEY TAKEAWAY:

Bedroom styles for 2020 are embracing new horizons. In light of this change, you should do the same and revamp your bedroom for the new decade. Try these styles out for 2020 and enjoy the lavish restyling!
